PROFILE SUMMARY

I am an enthusiastic BS Information Technology student at Islamia University Bahawalpur with a certified course from Mercury Sols. I have gained practical experience through freelancing projects and an internship at Curelogics, where I worked on real-world applications. Skilled in React.js, JavaScript (ES6+), HTML5, CSS3, and Node.js basics, I am seeking an opportunity at CodesInc to apply my skills, contribute to live projects, and continue learning in a professional environment.

EDUCATION

ISLAMIA UNIVERSITY BAHAWALPUR,   2022 – 2026
Bachelor of Information Technology
- 7th sem
- GPA: 3.72 /4 .0

Responsibility & Ownership

PROJECT EXPERIENCE:

1-Lead Gen PRO- Insurance Website, *Role: UI Frontend Developer*
Tech Used: HTML, CSS, JavaScript, React.js, tailwind css
- Developed responsive and user-friendly Ul components for an insurance web platform.
- Worked closely with the design to implement clean, consistent layouts across devices.
- Focused on creating intuitive navigation and ensuring pixel-perfect frontend design.

2-Collabry - Meeting App, *Role: UI Frontend Developer*
Tech Used: HTML, CSS, JavaScript, React.js, tailwind css
- Designed and built UI interfaces for a meeting and scheduling web app.
- Collaborated with a senior developer to implement screens, modals, and form elements.
- Ensured frontend code quality, responsiveness, and consistent styling.

3 - Kick Expert – AI Football Quiz Platform, *Role: Frontend Developer*
Tech Used: Next.js, React.js, Node.js, Tailwind CSS, OpenAI API
Developed a dynamic football quiz and AI Q&A platform for fans. Built responsive and engaging UI components with Tailwind CSS and React. Integrated OpenAI API for intelligent football history answers. Implemented admin and user dashboards for quiz management and performance tracking.

COURSES

Business Development-Curelogics

Completed a professional course focused on business growth strategies, client communication, and lead generation. Learned how to research markets, build strong client relationships, create proposals, and identify new business opportunities to help companies grow effectively.

Frontend Development Course – Mercury Sols:
Completed a hands-on course covering MongoDB, Express.js, React.js, and Node.js. Learned to build full-stack web applications, handle APIs, manage databases, and create dynamic, responsive user interfaces using modern web development practices.
